

# Aluminium Extruded Roller Shutters

# BD40 and BD55

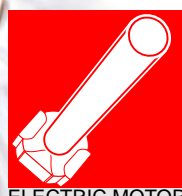

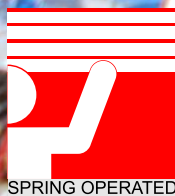

## Extruded Aluminium Security Roller Shutters

Manufactured from double wall extruded aluminium lath. The special design provides great strength and is extremely compact, allowing it to roll into a small aluminium box with a 45° chamfered edge to minimise their visual impact.

The small aluminium box slots neatly into the extended aluminium guide. Again the guide is manufactured for security without being too obtrusive.

### Options & Features

See page 5 for further detail.

# BD56 & BD84 Punched Shutters

With optional reinforcement profile

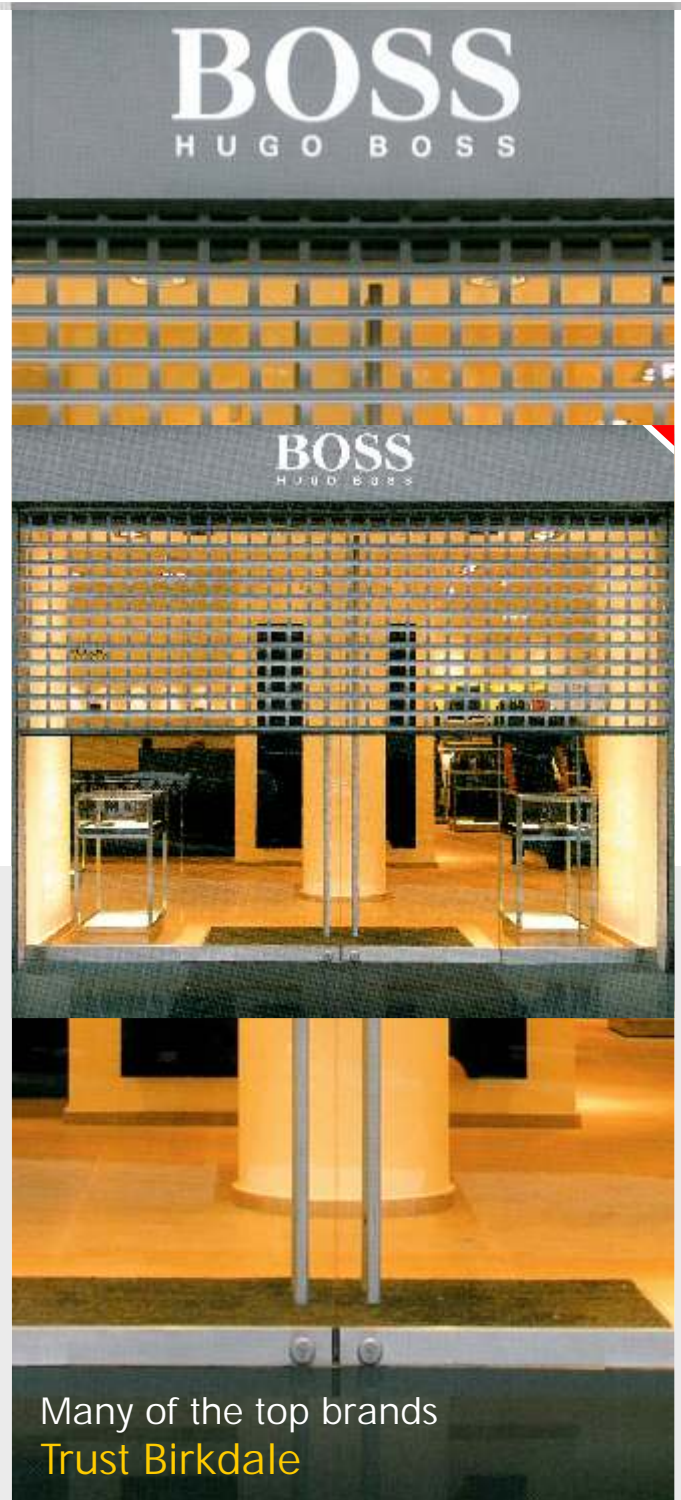

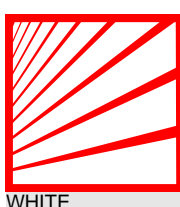

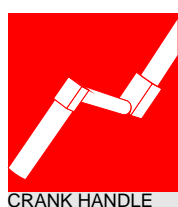

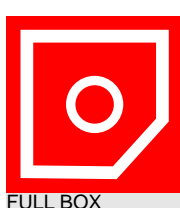

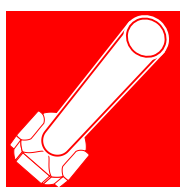

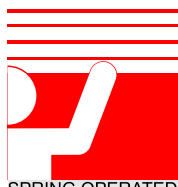

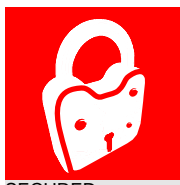

Style and security...

All the benefits of the BD40<sup>®</sup> and BD55<sup>®</sup> but with punched holes.

Maintain a high level of visibility and by adding the optional reinforcement profile you do not compromise on the security. Allowing your potential customers to window shop 24/7

## Options & Features

See page 5 for further detail.

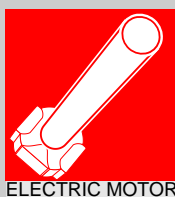

# Features

Lift it up and down by hand by using our spring assisted barrel design with manual locking.

Operate from inside without the need of an electrical supply with our crank handle operated gearbox with built in autolocks.

Powered by high quality tube motor with manual override and a 5 year warranty. Operated by various controls. Ask for details.

All electric and crank operated shutters have built in autolocks. When the door is closed a spring clamp device holds the door down tight. The Spring operated shutters feature a slim line bottom rail lock

Our shutters are made of aluminium. Unlike steel this will not rust and looks much more attractive.

Curtain is finished in white colour as standard with the optional extra of powder coating and laminated colours and woodgrain finishes .

This prevents accidental finger entrapment and finishes the roller shutter off nicely. The fully box is in one piece with no unsightly rivets and no sagging unlike with steel hoods. This comes finished in white and can be powder coated any other colour as an optional extra.

BD40<sup>®</sup> , BD55<sup>®</sup> , BD56<sup>®</sup> and BD86<sup>®</sup> with reinforcement profile are made from a double wall aluminium extrusion. This is much stronger than single skin steel shutters.

## Colour options

For a small extra cost add powder coating in any BS/RAL colour to match your corporate image.

## Quality control

Our shutters are CE marked to BS EN 13241-1:2003. The principle European standard identifies all the critical health and safety considerations within the design and manufacture of the product. This gives resellers, users and consumers the necessary reassurance that they are purchasing a safe and reliable product.

Our products are manufactured under an ISO:9001 Quality management system, assuring you that your door is monitored from start to finish.

Our products are manufactured under an ISO:14001 environment management system assuring you that we monitor and reduce our carbon footprint wherever possible.

Over the past 20 years, Birkdale has prided itself on developing a leadership role within our industry. During this period, we have constantly challenged ourselves to offer an unparalleled range and diversification of products.

Customer service continues to be the cornerstone of our business. Our professionally trained staff of experienced men and women welcome with open arms the everyday challenges which exist in our industry...

At Birkdale, our team recognizes we will be judged by the most recent experience each customer has with us. As such, we strive to make each transaction as efficient, productive, and pleasant as possible.

All of us at Birkdale recognise the value of customer service and we remain totally committed to demonstrating our gratitude to those who place their business with us. To those potential customers viewing us perhaps for the first time, we invite to experience at first hand Birkdale products and service.
